THE CREATIVE INNOVATION

HOME RUN – For Heavy Moving

TCI EV's are small, powerful and highly maneuverable, powered with a clean environment in mind

HOME RUN is designed for in- and outdoors

- HOME RUN units are standard or custom made TCI EVs (Electric Vehicles).
- HOME RUN is ideal for transporting heavy loads safely and with ease in- or outdoors.
- HOME RUN's sturdy built frame and strength makes it possible to carry and move loads up to 660 lbs. (300 kg). It is easy to operate. Our customizing capabilities address a size range of HOME RUN models depending on need.
- HOME RUN is always ready to work. It has a built-in charger for con-

venience. The batteries are charged by plugging the unit into any 115-120 VAC outlet.

CONSTRUCTION AND COMPONENTS

Frame and Body: Heavy welded steel frame and sheet metal enclosure.

Wheels: Traction type tires, foamed filled.

Brake: Regenerative electronic system with automatic parking brake.

Finish: Standard green. Other color options available.
